

FINANCE MSc

BASIC INFORMATION

Field of training group:

Economics

Name of the qualification included in the diploma:

Economist master's degree in finance

Language of course:

Hungarian and English

Purpose of course:

Launch economic specialists with a high level of financial and economic literacy who are able to think independently, creatively, with an economic perspective, manage and analyze the financial processes of the economy at both the macro and micro levels.

Possessing advanced business and methodological knowledge, consciously developed management skills and abilities, graduates of the master's degree in finance become suitable for performing financial tasks in various areas of domestic and international economic life, in the public and private sectors, processing and enriching the financial literature, and for joining PhD training programs

Application conditions:

- The course that directly, "linearly" establishes the master's course in finance is the "Finance and Accounting" BSc course.
- The basic curriculum of the course was designed based on the assumed level of knowledge of those with such a basic qualification.
- The course is also open to applicants with other basic qualifications, as long as they, on the one hand, have proven theoretical and methodological foundational knowledge of the content and level corresponding to the basic courses in economics, and on the other hand, they have several credits of preliminary studies in other areas of economics as well.
